No Seal State Speed to Market Profile

In early March 2015, the Speed to Market Task Force adopted several changes to the filing metrics used to calculate the Filing Turnaround statistic provided in this assessment report in order to more accurately represent the states' efforts to review filings promptly. Because the calculation has been modified, it will be difficult to compare the Filing Turnaround statistics from prior to March 2015 and those statistics after that date. The calculation has been modified as follows: 1) days spent waiting for a filer response are removed from the calculation and 2) inactive days are removed from the calculation, ex. when a filing has been closed and then is reopened, the days between those two events are no longer included in the filing turnaround statistic.

Outstanding Issues Detail

Initiative

- | | |
|---|--|
| 1 | State has not yet passed Compact legislation. |
| 2 | Filing review exceeds target turnaround maximum of 40 days for P&C. |
| 3 | Filing review exceeds target turnaround maximum of 40 days for Life. |
| 4 | Filing review exceeds target turnaround maximum of 40 days for Health. |
