IDENTIFICATION OF ITEM(S) TO CHANGE

Add columns to Life and Fraternal State Pages for types of life insurance; separate into individual life, group life, individual annuities and group annuities; update columns on Accident and Health Insurance table to coincide with information from Health Statement. Add lines for direct losses incurred and paid to Accident and Health table. Number sequentially between tables. Coordinate columns between various schedules by adding columns or validations to map data. Delete Interest Sensitive Supplement and Annuities Supplements. Add new appendix for Definitions of Lines of Business and move expense allocation instructions from Analysis of Operations to appendices. Renumber all subsequent pages.

REASON, JUSTIFICATION FOR AND/OR BENEFIT OF CHANGE**

This proposes to obtain more detail by state on the types of policies being sold by jurisdiction as requested by regulators. It will also make the State Page uniform between the life and fraternal blanks. This will coordinate product lines between schedules and eliminate duplication, where possible. The life and annuity categories are found in *SSAP No. 50—Classifications of Insurance or Managed Care Contracts* and the *Uniform Life, Accident & Health, Annuity and Credit Product Coding Matrix*. The changes to the health table are consistent with the Health Statement State Page, which will allow for more accurate comparisons and more meaningful aggregate data.

STATE PAGE

Schedules should be prepared and submitted to the state of domicile for each jurisdiction in which the company has written direct business, has direct losses paid or direct losses incurred. To other states in which the company is licensed it should submit only a schedule for that state.

Deleted: A s

Unless domiciliary state regulations differ, use Definitions of Lines of Business located in the Appendix to this manual.

Direct premiums by state may be estimated by formula on the basis of countrywide ratios for the respective lines of business except where adjustments are required to recognize special situations.

Company's participation in the FEGLI and SGLI policies is shown in this exhibit as direct business.

This exhibit should be shown excluding reinsurance assumed. Reinsurance ceded should not be deducted.

Fraternal entities should leave blank any data elements not applicable such as group and credit.

Accident and Health Insurance:

Written premium is defined as the contractually determined amount charged by the reporting entity to the policyholder for the effective period of the contract based on the expectation of risk, policy benefits, and expenses associated with the coverage provided by the terms of the insurance contract. For health contracts without fixed contract periods, premiums written will be equal to the amount collected during the reporting period plus uncollected premiums at the end of the period less uncollected premiums at the beginning of the period.

Column 1 – Total

Line 75	– Total Members at End of Current Year	Deleted: 5
	Show total members at the end of the year.	
Line 76	– Current Year Member Months	Deleted: 6
	A member month is equivalent to one member for whom the reporting entity has recognized premium revenue for one month. Where the revenue is recognized for only part of a month (or other relevant time period) for a given individual, a pro-rated partial member month may be counted. Accumulate member months for the period.	
Lines 77 through 79	– Ambulatory Encounters	Deleted: 7
	The accrued ambulatory encounters experienced by the total membership during the time period. “Ambulatory Encounters” are further defined as follows:	Deleted: 9
	Ambulatory Services	
	Health services provided to reporting entity members who are not confined to a health care institution. Ambulatory services are often referred to as “outpatient” services, as distinct from “inpatient” services.	
	Encounter	
	Contact between a reporting entity member and a provider of health care services who exercises independent judgment in the care and provision of health service(s) to the member. The term “independent” is used synonymously with self-reliant, to distinguish between providers who assume major responsibility for the care of individual members and all other personnel who assist in providing that care.	
Line 77	– Physician	Deleted: 7
	Encounters provided by physicians only.	
Line 78	– Non-Physician	Deleted: 8
	Encounters provided by other health professionals.	

Line 80 – Total Hospital Patient Days Incurred

The accrued number of hospital patient days experienced by the total membership during the time period.

This also provides for accruing hospital utilization for which the reporting entity may ultimately be financially responsible, consistent with accrued expenses shown in financial reports.

A “Patient Day” is a period of service rendered an inpatient with the day of discharge being counted only when the patient was admitted on the same day. Newborns whose inpatient stay is concurrent with the mother’s stay should not be counted separately from the mother’s patient days. Newborns whose inpatient stay is longer than the mother’s should be counted as separate days for the period beginning with the discharge of the mother.

Deleted: INSTRUCTIONS FOR ALLOCATION OF RECEIPTS AND EXPENSES¶

SECTION A – PURPOSE¶

¶ For the purpose of making a suitable and equitable allocation of receipts and expenses as between: (1) lines of business, - (2) investment expense and insurance expense, and (3) affiliated or associated companies, reporting entities shall observe the standards and rules hereinafter prescribed.¶

¶ The primary objective of these instructions is to establish principles (i.e., standards) for allocation of receipts and expenses by reporting entities. It is recognized that the choice of methods employed by any reporting entity of necessity will be dictated by condition peculiar to its size, mode of operation, and the classes of business that it writes. Recognition also is given to the existence of systems of cost analysis that have been developed by reporting entities as a part of overall programs for control of expenses and for other collateral purposes, including the allocation of receipts and expenses by lines of business.¶

SECTION B – DEFINITIONS¶

¶ Wherever used in these instructions, the following terms shall have the respective meaning hereinafter set forth or indicated, unless the context otherwise requires:¶

LINE OF BUSINESS¶

¶ Has the meaning assigned to it by Section C.¶

DEPARTMENT¶

¶ Means any administrative unit, such as a division, bureau, section, team or branch office used in departmental cost analysis or under a cost center concept.¶

OPERATING DEPARTMENT¶

¶ Means an organizational unit directly engaged in production or servicing of contracts, or investment activities, - e.g., policy issue, policy loan, selection, premium collection, etc., as distinguished from a "service department" which performs work for other departments, such as mail, supply, personnel, etc.¶

SERVICE DEPARTMENT¶

¶ Has the meaning assigned to it in the definition of operating department.¶

ACTIVITY¶

¶ Means the work, or one of several lines of work, carried on within any unit or organizational subdivision of the company.¶

Exclude: Policies providing Medicare Part D Prescription Drug Coverage through a Medicare Advantage product.

Line 1 – Net Premium Income

Should equal direct written premiums plus reinsurance assumed less reinsurance ceded.

Written premium is defined as the contractually determined amount charged by the reporting entity to the policyholder for the effective period of the contract based on the expectation of risk, policy

benefits, and expenses associated with the coverage provided by the terms of the insurance contract. For health contracts without fixed contract periods, premiums written will be equal to the amount collected during the reporting period plus uncollected premiums at the end of the period less uncollected premiums at the beginning of the period.

Include: Accrued return premium adjustments for contracts subject to redetermination.

Line 2 – Change in Unearned Premium Reserves and Reserve for Rate Credit

Exclude: Reserves relating to uninsured plans and the uninsured portion of partially insured plans.

Line 3 – Fee-for-Service (net of \$ medical expenses)

Include: Revenue recognized by the reporting entity for provision of health services to non-members by reporting entity providers and to members through provision of health services excluded from their prepaid benefit packages. Include in the inside amount, the medical expenses associated with fee-for-service business.

Line 4 – Risk Revenue

Include: Amounts charged by the reporting entity as a provider or intermediary for specified medical services (e.g., full professional, dental, radiology, etc.) provided to the policyholders or members of another insurer or reporting entity.

Unlike premiums that are collected from an employer group or individual member, risk revenue is the prepaid (usually on a capitated basis) payment, made by another insurer or reporting entity to the reporting entity in exchange for services to be provided or offered by such organization.

Line 5 – Aggregate Write-ins for Other Health Care Related Revenues

Enter the total of the write-ins listed in schedule Details of Write-ins Aggregated at Line 5 for Other Health Care Related Revenues.

Line 7 – Hospital/Medical Benefits

Include: Expenses for physician services provided under contractual arrangement to the reporting entity.

Salaries, including fringe benefits, paid to physicians for delivery of medical services. Capitation payments by the reporting entity to physicians for delivery of medical services to reporting entity subscribers.

Fees paid by the reporting entity to physicians on a fee-for-service basis for delivery of medical services to reporting entity subscribers. This includes capitated referrals.

Inpatient hospital costs of routine and ancillary services for reporting entity members while confined to an acute care hospital.

Charges for non-reporting entity physician services provided in a hospital are included in this line item only if included as an undefined portion of charges by a hospital to the reporting entity. (If separately itemized or billed, physician charges should be included in outside referrals, below.)

The cost of utilizing skilled nursing and intermediate care facilities.

Routine hospital service includes regular room and board (including intensive care units, coronary care units, and other special inpatient hospital units), dietary and nursing services, medical surgical supplies, medical social services, and the use of certain equipment and facilities for which the provider does not customarily make a separate charge.

Ancillary services may also include laboratory, radiology, drugs, delivery room, physical therapy services, other special items and services for which charges are customarily made in addition to a routine service charge.

Skilled nursing facilities are primarily engaged in providing skilled nursing care and related services for patients who require medical or nursing care or rehabilitation service.

Intermediate care facilities are for individuals who do not require the degree of care and treatment that a hospital or skilled nursing-care facility provides, but that do require care and services above the level of room and board.

Report gross of reinsurance. Report net of coordination of benefits, co-payments and subrogation.

Exclude: Expenses for medical personnel time devoted to administrative tasks.

Emergency room and out-of-area hospitalization.

All items meeting the definition of Cost Containment Expenses found in SSAP No. 55—Unpaid Claims, Losses and Loss Adjustment Expenses.

Line 8 – Other Professional Services

Include: Expenses for other professional providers under contractual arrangement to the reporting entity.

Salaries, as well as fringe benefits, paid by the reporting entity to non-physician providers licensed, accredited or certified to perform specified health services, consistent with state law, engaged in the delivery of medical services.

Compensation to personnel engaged in activities in direct support of the provision of medical services. For example, include compensation to pharmacists, dentists, psychologists, optometrists, podiatrists, extenders, nurses, clinical personnel such as ambulance drivers and technicians.

Exclude: Professional services not meeting this definition. Report these services as administrative expenses. For example, exclude compensation to paraprofessionals, janitors, quality assurance analysts, administrative supervisors, secretaries to medical personnel, and medical record clerks.

Prescription drugs.

All items meeting the definition of Cost Containment Expenses found in SSAP No. 55—Unpaid Claims, Losses and Loss Adjustment Expenses.

Line 9 – Outside Referrals

Include: Expenses for providers not under arrangement with the reporting entity to provide services, such as consultations, or out-of-network providers.

Line 10 – Emergency Room and Out-of-Area

Include: Expenses for other health delivery services including emergency room costs incurred by members for which the reporting entity is responsible and out-of-area service costs for emergency physician and hospital.

In the event a member is admitted to the health care facility immediately after seeking emergency room service, emergency service expenses are reported in this line, the expenses after admission are reported in the hospital/medical line, provided the member is seeking services in the service area. Out-of-area expenses incurred, whether emergency or hospital, are reported in this line.

Line 11 – Prescription Drugs

Include: Expenses for Prescription Drugs and other pharmacy benefits covered by the reporting entity.

Deduct: Pharmaceutical rebates relating to insured plans.

Exclude: Prescription drug charges that are included in a hospital billing which should be classified as Hospital/Medical Benefits on Line 7.

Line 12 – Aggregate Write-ins for Other Hospital and Medical

Enter the total of the write-ins listed in schedule Details of Write-ins Aggregated at Line 12 for Other Medical and Hospital.

Line 13 – Incentive Pool, Withhold Adjustments and Bonus Amounts

This category is for adjusting the full medical expenses reported by means of both debit and credit entries. For example, report physician withholds forfeited to the reporting entity as a credit entry. Report amounts incurred due to an arrangement whereby the reporting entity agrees to utilization savings with a provider as a debit entry.

Line 15 – Net Reinsurance Recoveries

Amounts recovered and recoverable from reinsurers on paid losses.

Include: Amounts related to assumed and ceded business.

Line 17 – Claims Adjustment Expenses, Including \$ Cost Containment Expenses

All expenses incurred in connection with the recording, adjustment and settlement of claims. This includes the total of the expense classification “Other Claim Adjustment Expenses” and all “Cost Containment Expenses”.

Cost Containment Expenses and Other Claim Adjustment Expenses have been defined in SSAP No. 55—Unpaid Claims, Losses and Loss Adjustment Expenses. Refer to SSAP No. 55 for accounting guidance.

Line 18 – General Administrative Expenses

Refer to SSAP No. 70—Allocation of Expenses for accounting guidance.

Exclude: All expenses related to cost containment activities in accordance with SSAP No. 55—Unpaid Claims, Losses and Loss Adjustment Expenses.

Deleted: in the Underwriting and Investment Exhibit, Part 3, Analysis of Expenses.

Line 19 – Increase in Reserves for Accident and Health Contracts

Include: Increase in policy reserves.

Change in premium deficiency reserve.

Detail of Write-ins Aggregated at Line 5 for Other Health Care Related Revenues

Include: Revenue from sources not covered in the other revenue accounts.

Details of Write-ins Aggregated at Line 12 for Other Hospital and Medical

Include: Other hospital and medical expenses not covered in the other claims accounts.

ANALYSIS OF INCREASE IN RESERVES DURING THE YEAR – INDIVIDUAL LIFE INSURANCE

This exhibit analyzes the development of life policy and contract reserves by showing how the reserve may be traced mathematically from one year-end to the next by taking account of its various theoretical components:

Reinsurance – Ordinarily, it will be satisfactory to compute all items net of reinsurance ceded. However, companies will generally find it more useful to compute gross and reinsurance ceded separately, unless the latter is not material.

Coinsurance – For the ceding company, all items are computed similarly to its own direct business. For the assuming company, all items are included with its direct business and are similarly computed.

Modified Coinsurance – For the ceding company, there is no deduction from reserves for reinsurance ceded.

Yearly Renewable Term Reinsurance – For the ceding company, items are computed on the same basis as its direct business. For the assuming company, all items are included with its direct business and are similarly reported.

A company shall not omit the columns for any lines of business in which it is not engaged. All figures for the individual variable life insurance business of the company, excluding separate accounts items, shall be included in Columns 8 or 9, as applicable.

- Include: Net transfers to or (from) separate accounts of net premiums, considerations.
- Line 15 – Reserve December 31 of Current Year
- Line 8 minus Line 14. Amounts reported should equal (net) reserves by lines of business from Exhibit 5.

An Analysis of Increase in Reserves is done by annual statement line of business, and within each line according to these formula types: insurance, annuity, and contracts with life or disability contingencies. The instructions specify that the various items are either to be derived from basic data or derived by formula. One item is always to be derived as the balancing item in its reserve analysis formula. Thus, the accuracy of the analysis for each line of business and formula type should be verified by the reasonableness of the various balancing items.

The balancing item for life insurance, accidental death benefit, and active life disability reserves is tabular cost. Tabular cost for life insurance can be expressed as the summation of the products of mortality rates times the excess of the face amount over the reserve. Using the tabular cost that was derived in the reserve analysis, the amount of insurance in force, and the reserves, the average mortality rate that is implied by the reserve analysis can be determined. This rate should be reasonable considering the nature of the in force and should show a reasonable progression from year to year.

The balancing item for annuity, supplementary contracts with life contingencies, and disabled life reserves is tabular less actual reserve released. This item reflects the relationship between the mortality and claim termination rates used for the reserves and the corresponding company experience. The level of this item and its variation from year to year should be reasonable in terms of these factors.

Columns 2-8 – Use Formula 2 for all annuities “with a life contingency” basis. Use Formula 1 for disability, active lives; Formula 2 for disabled lives; and Formula 3 for interest only benefits.

Column 8 – Use Formula 2 for Group Annuity contracts valued on a “with life contingencies” basis. Companies that include active life disability reserve under Group Annuity contracts in this column should use Formula 1 for such. Use Formula 3 for group annuity contracts valued on a “without life contingencies” basis if they are included in Exhibit 8.

Line 6 – Increase in Reserve on Account of Change in Valuation Basis

Enter appropriate amounts from Part A of Exhibit 5A – Changes in Bases of Valuation During the Year.

Line 6.1 – Change in Excess of VM-20 Deterministic/Stochastic Reserve over Net Premium Reserve

As the line item describes, this is the change in excess of any Deterministic/Stochastic reserve over the amount of the VM-20 Net Premium Reserve.

Line 7 – Other Increases (Net)

Enter amounts that affect reserves but that are not included elsewhere (transfers between lines of business, group conversions, etc.).

Include: Adjustments due to fluctuations in foreign exchange rates.

Line 10 – Reserves Released by Death

Entries should be made only in the columns involving life insurance. Enter terminal reserves released.

Exclude Deterministic/Stochastic Reserves from the reporting of Reserves Released by Death

Line 11 – Reserves Released by Other Terminations (Net)

Enter reserves released by all causes in Columns 4, 5 and 8 and other than by death in Columns 2, 3, 6 and 7. The computation should be on a net basis so as to take account of revivals, increases, changes, etc.

Exclude Deterministic/Stochastic Reserves from the reporting of Reserves Released by Other Terminations (Net)

Line 12 – Annuity, Supplementary Contract, Disability Payments Involving Life Contingencies

Include: Surrender payments on annuities and supplementary contracts with life contingencies.

Line 13 – Net Transfers to or (From) Separate Accounts

Include: Net transfers to or (from) separate accounts of net premiums, considerations.

Line 15 – Reserve December 31 of Current Year

Line 8 minus Line 14. Amounts reported should equal (net) reserves by lines of business from Exhibit 5, in part.

An Analysis of Increase in Reserves is done by annual statement line of business, and within each line according to these formula types: insurance, annuity, and contracts with life or disability contingencies. The instructions specify that the various items are either to be derived from basic data or derived by formula. One item is always to be derived as the balancing item in its reserve analysis formula. Thus, the accuracy of the analysis for each line of business and formula type should be verified by the reasonableness of the various balancing items.

The balancing item for life insurance, accidental death benefit, and active life disability reserves is tabular cost. Tabular cost for life insurance can be expressed as the summation of the products of mortality rates times the excess of the face amount over the reserve. Using the tabular cost that was derived in the reserve analysis, the amount of insurance in force, and the reserves, the average mortality rate that is implied by the reserve analysis can be determined. This rate should be reasonable considering the nature of the in force and should show a reasonable progression from year to year.

The balancing item for annuity, supplementary contracts with life contingencies, and disabled life reserves is tabular less actual reserve released. This item reflects the relationship between the mortality and claim termination rates used for the reserves and the corresponding company experience. The level of this item and its variation from year to year should be reasonable in terms of these factors.

Cash Surrender Value:

Line 16 – Report cash surrender values (CSV) for prior year end by category.

Line 17 – Increases in CSV value during year

Line 18 – Decreases in CSV value during year

Line 19 – Ending CSV balance December 31, current year

DEFINITIONS OF LINES OF BUSINESS

From Accounting Practices and Procedures Manual, SSAP No. 50— Classifications of Insurance or Managed Care Contracts:

- Life Insurance – The primary purpose is to provide financial assistance to a beneficiary at the insured’s death.
 - Ordinary life insurance is between the company and the policy owner (often the insured). Many variations of ordinary life coverages are available to a purchaser of insurance, including participating, limited-payment periods, combinations of coverages, and decreasing (or increasing) death benefits.
 - Industrial life insurance, also called “debit” insurance, is insurance under which premiums are paid monthly or more often, the face amount of the policy does not exceed a stated amount, and the words “industrial policy” are printed in prominent type on the face of the policy.
 - Whole life contracts provide a fixed amount of insurance coverage over the life of the insured and the related benefits are normally payable only upon the insured’s death.
 - Term life contracts provide insurance over a specified period of time. If the insured dies during this term, the face amount of the policy will be paid to the beneficiary.
 - Supplementary contracts with life contingencies are a type of agreement between the insurance company and either the insured or the beneficiary, usually to provide for full or partial settlement of the amount payable upon the termination of an original contract.
 - Group life contracts are insurance on the lives of a group of persons under a single master contract.
 - Universal life and variable life contracts include those contracts which have terms that are not fixed and guaranteed relative to premium amounts, expense assessments, or benefits accruing to the policyholder. These contracts generally provide for death benefits and nonforfeiture values and may be issued on a fixed premium basis or on a flexible premium basis where the premiums are paid at the insured’s discretion.
 - An annuity contract is an arrangement whereby an annuitant is guaranteed to receive a series of stipulated amounts commencing either immediately or at some future date.

From Accounting Practices and Procedures Manual, Appendix A-585—Universal Life Insurance:

“Fixed premium universal life insurance policy” means a universal life insurance policy other than a flexible premium universal life insurance policy.

“Flexible premium universal life insurance policy” means a universal life insurance policy which permits the policyowner to vary, independently of each other, the amount or timing of one or more premium payments or the amount of insurance.

“Interest-indexed universal life insurance policy” means any universal life insurance policy where the interest credits are linked to an external referent.

“Net cash surrender value” means the maximum amount payable to the policyowner upon surrender.

“Policy value” means the amount to which separately identified interest credits and mortality, expense, or other charges are made under a universal life insurance policy.

“Universal life insurance policy” means a life insurance policy where separately identified interest credits (other than in connection with dividend accumulations, premium deposit funds, or other supplementary accounts) and mortality and expense charges are made to the policy. A universal life insurance policy may provide for other credits and charges, such as charges for the cost of benefits provided by rider.

“Credit life insurance” means insurance on a debtor or debtors, pursuant to or in connection with a specific loan or other credit transaction, to provide for satisfaction of a debt, in whole or in part, upon the death of an insured debtor.

From Contingent Deferred Annuity (CDA) Working Group of the Life Insurance and Annuities (A) Committee:

A Contingent Deferred Annuity (CDA) is defined as an annuity contract that establishes a life insurer's obligation to make periodic payments for the annuitant's lifetime at the time designated investments, which are not owned or held by the insurer, are depleted to a contractually defined amount due to contractually permitted withdrawals, market

performance, fees and/or other charges. A CDA is an insurance product that provides protection against underperforming and downward performing markets in the form of an income guarantee on outside investment accounts owned by an insured. The income guarantee is provided through the collection of ongoing fees from within these outside investment accounts. The insured must agree to certain portfolio restrictions and must first deplete their outside investment account assets at the CDA guaranteed income amount and rate according to the contract and prior to the insurer's assumption of this amount. A CDA is considered a living benefit added to an investment account.

From Uniform Life, Accident and Health, Annuity and Credit Product Coding Matrix:

Guaranteed Interest Contracts (GICs) – contracts that guarantee principal and interest for a specified period of time and include the option to purchase immediate annuities that depend on the survival of the annuitant.

From NY

Supplementary Contract – An agreement between a life insurance company and a policyowner or beneficiary in which the company retains at least part of the cash sum payable under an insurance policy and makes payment in accordance with the settlement option chosen.

(https://www.allbusiness.com/barrons_dictionary/dictionary-supplementary-contract-4956062-1.html)

Terms of a settlement of a life insurance or annuity contract under which monies are currently payable or used at least in part by the beneficiary to fund a new insurance policy. Supplementary contracts are a balance sheet liability for a life company. They represent money held for policyholders that will eventually be paid out. But because the contract no longer involves insurance on a life, it is not included in the company's policy reserves.

Flexible Premium Adjustable Life: A group life insurance that provides a face amount that is adjustable to the certificate holder and allows the certificate holder to vary the modal premium that is paid or to skip a payment so long as the certificate value is sufficient to keep the certificate in force, and under which separately identified interest credits (other than in connection with dividend accumulation, premium deposit funds or other supplementary accounts) and mortality and expense charges are made to individual certificates while providing minimum guaranteed values.

From Accounting Practices and Procedures Manual:

Appendix A-235, **interest-indexed annuity contract** means any annuity contract where the interest credits are linked to an external reference.

Appendix A-250, **variable annuity** means a policy or contract, individual or group, that provides for annuity benefits that vary according to the investment experience of a separate account or accounts maintained by the insurer as to the policy or contract.

Unallocated annuity considerations and other unallocated deposits that incorporate any mortality or morbidity risk and are not reported on Line 1, Line 2 or Line 3. See the instructions to the Life, Health & Annuity Guaranty Association Model Act Assessment Base Reconciliation Exhibit and Adjustments to the Life, Health & Annuity Guaranty Association Model Act Assessment Base Reconciliation Exhibit for allocated and unallocated annuities.

DEFINITIONS SPECIFICLY RELATED TO ACCIDENT AND HEALTH

Riders/Endorsements/Floaters:

If a rider, endorsement or floater acts like a separate policy with separate premium, deductible and limit, then it is to be recorded on the same line of business as if it were a stand-alone policy regardless of whether it is referred to as a rider, endorsement or floater. If there is no additional premium, separate deductible or limit, the rider, endorsement or floater should be reported on the same line of business as the base policy.

Comprehensive (Hospital & Medical):

Business that provides for medical coverage including hospital, surgical, & major medical. Includes State Children's Health Insurance Program (SCHIP) Medicaid Program (Title XXI) risk contracts. Also includes medical only programs that provide medical only benefits without hospital coverage. Does not include self-insured business as

well as federal employees health benefit programs (FEHBP), Medicare & Medicaid programs, and dental only business.

Medicare Supplement:

Business reported in the Medicare Supplement Insurance Experience Exhibit of the annual statements. Does not include Medicare (Title XVIII) or Medicaid (Title XIX) risk contracts.

Dental-Only:

Policies providing for dental only coverage issued as stand-alone dental or as a rider to a medical policy that is not related to the medical policy through, premiums, deductibles or out-of-pocket limits. Does not include self-insured business, as well as federal employees health benefits plans (FEHBP), or Medicare and Medicaid programs.

Vision-Only:

Policies providing for vision only coverage issued as stand-alone vision or as a rider to a medical policy that is not related to the medical policy through, premiums, deductibles or out-of-pocket limits. Does not include self-insured business, federal employees health benefit plans (FEHBP), or Medicare and Medicaid programs.

Federal Employees Health Plans (FEHBP):

Business allocable to the Federal Employees Health Benefit Plan premium that are exempted from state taxes or other fees by Section 8909(f)(1) of Title 5 of the United States Code. Does not include Medicare & Medicaid programs.

Medicare Cost:

Contracts with the Centers for Medicare & Medicaid Services (CMS) to provide services that are paid a pre-determined monthly amount per member based on a total estimated budget. The beneficiary can use providers outside the provider network. Does not include policies providing stand alone Medicare Part D Prescription Drug Coverage which are reported within the Other Health line of business.

Medicare Risk:

Contracts with the Centers for Medicare & Medicaid Services (CMS) whereby managed care is paid a per capita premium per member. Assume full financial risk for all care provided to Medicare Risk members. With the exception of emergency and out-of area urgent care, members must receive all of their care through the managed care plan; however, an out-of network option can be provided. Does not include policies providing stand alone Medicare Part D Prescription Drug Coverage which are reported within the Other Health line of business.

Medicare Other:

Health Care Prepayment Plans (HCPP) – similar to Medicare Cost. Contracts with the Centers for Medicare & Medicaid Services (CMS) but only covers part of the Medicare Benefit package. HCCP's do not cover Medicare Part A services (inpatient hospital care, skilled nursing, hospice and some home health care).

Medicare +Choice –Contracts with the Centers for Medicare & Medicaid Services (CMS) and a variety of different managed care and fee-for-service entities (i.e., HMO, PPO, PSO) with benefits to members similar to Medicare Risk as defined under the Balanced Budget Act of 1997.

Does not include policies providing stand alone Medicare Part D Prescription Drug Coverage which are reported within the Other Health line of business.

Medicaid Cost:

Those members enrolled under a prepaid contract between the reporting entity and the appropriate state agency administering medical assistance under a state plan approved under Title XIX of the Social Security Act where that

agency agrees to pay part or all of the member's financial obligation to the reporting entity. The beneficiary can use providers outside the provider network.

Medicaid Risk:

A prepaid contract between a managed care entity and the appropriate state agency administering medical assistance under a state plan approved under Title XIX of the Social Security Act where that agency agrees to pay part or all of the member's financial obligation to the Health Organization.

Self-Funded:

Business where the health-care organization agrees to provide services to a third party self-insured group. Includes Administrative Services Contracts where the organization advances its own funds in payment of claims and issues its own membership card and use of their provider network to the members of the groups and Administrative Services Only Contracts where the organization utilizes the group's funds in payment of claims.

PRODUCT LINES:

HMO (Health Maintenance Organization):

An entity that provides, arranges or offers coverage of designated health services needed by plan members for a fixed prepaid premium.

There are four basic HMO models:

- a. Group Model
- b. Individual Practice Association
- c. Network Model
- d. Staff Model

An entity must have three characteristics to be an HMO:

- 1. An organized system for providing health care or otherwise assuring health care delivery in a geographic area.
- 2. An agreed upon set of basic and supplemental health maintenance and treatment services.
- 3. A voluntary enrolled group of people.

PPO (Preferred Provider Organization):

A program in which contracts are established with providers of medical care, referred to as preferred providers. Usually the benefit contract offers better benefits (fewer copayments) for services received from a preferred provider, thus encouraging members to use these providers. Members are allowed benefits for non-participating provider services on an indemnity basis with significant copayments. Providers may be paid on a discounted fee-for-service basis. A PPO arrangement can be insured or uninsured

POS (Point of Service):

A type of health plan allowing the covered person to choose to receive a service from a participating or non-participating provider, with different benefit levels associated with the use of participating providers.

There are several ways POS can be provided:

- a. An HMO may allow members to obtain limited services from non-participating providers.

b. An HMO may provide non-participating benefits through a supplemental major medical policy.

c. A PPO may be used to provide both participating and non-participating levels of coverage and access.

Hospital/Surgical:

An entity that provides coverage for inpatient care and surgical procedures associated with this inpatient care.

Dental (Only):

Entity providing Dental coverage in addition to health care coverage. Can also be a rider offered by the insuring company but covered by the dental insurer.

Vision (Only):

Entity providing Vision coverage in addition to health coverage provided by health care company.

Other (Specify):

Coverage provided by entities that do not fall within any of the other categories, including stop loss, disability and long-term care. Indemnity plans where the insured person is reimbursed for covered expenses would fall within this area.

Miscellaneous Definitions:

Encounter:

A contact between a member and a provider of health care services who exercise independent judgment in the area and provision of health services to the member. A claim would be one encounter.

Hospital Encounter:

An encounter administered in a hospital environment. Includes emergency room services.

Non-hospital Encounter:

An encounter administered outside a hospital environment, such as in the health care provider office.

Physician:

A licensed doctor of medicine or osteopathy licensed to practice medicine under the laws of the state or jurisdiction where the services are provided.

Non-physician:

Anyone other than a physician who is licensed, where required, to render covered services. Non-physician providers can include:

a. Chiropractor

b. Clinical Psychologist

c. Dentist

d. Optometrist

e. Physical Therapist

f. Physician Assistant

g. Nurse Practitioner

h. Social Worker

Inpatient:

A member who is treated as a registered bed patient in a hospital and for whom a room and board charge is made.

Outpatient:

A member not officially admitted as an inpatient, but who receives hospital care without occupying a hospital bed or receiving a room and board charge.

Admission:

Hospital inpatient care for any medical condition.

Hospital Day:

A day for which contractual coverage is provided to a member while receiving inpatient care. A stay up to and including midnight of the date of admission shall be considered one day, and an additional day will be counted at each midnight census after the first day that the member is still a patient.

Individual:

Health insurance where the policy is issued to an individual covering the individual and/or their dependents in the individual market. This includes conversions from group policies

Group:

The health organization contracts with an entity to provide health care services to a group of subscribers.

Member:

A person who has enrolled as a subscriber or an eligible dependent of a subscriber and for whom the health organization has accepted the responsibility for the provision of health services as may be contracted for.

New Appendix:

**INSTRUCTIONS FOR ALLOCATION OF RECEIPTS AND EXPENSES
RELATED TO ANALYSIS OF OPERATIONS BY LINES OF BUSINESS**

SECTION A – PURPOSE

For the purpose of making a suitable and equitable allocation of receipts and expenses as between: (1) lines of business, (2) investment expense and insurance expense, and (3) affiliated or associated companies, reporting entities shall observe the standards and rules hereinafter prescribed.

The primary objective of these instructions is to establish principles (i.e., standards) for allocation of receipts and expenses by reporting entities. It is recognized that the choice of methods employed by any reporting entity of necessity will be dictated by condition peculiar to its size, mode of operation, and the classes of business that it writes. Recognition also is given to the existence of systems of cost analysis that have been developed by reporting entities as a part of overall programs for control of expenses and for other collateral purposes, including the allocation of receipts and expenses by lines of business.

SECTION B – DEFINITIONS

Wherever used in these instructions, the following terms shall have the respective meaning hereinafter set forth or indicated, unless the context otherwise requires:

LINE OF BUSINESS

Has the meaning assigned to it by Definitions of Lines of Business Appendix.

DEPARTMENT

Means any administrative unit, such as a division, bureau, section, team or branch office used in departmental cost analysis or under a cost center concept.

OPERATING DEPARTMENT

Means an organizational unit directly engaged in production or servicing of contracts, or investment activities, e.g., policy issue, policy loan, selection, premium collection, etc., as distinguished from a “service department” which performs work for other departments, such as mail, supply, personnel, etc.

SERVICE DEPARTMENT

Has the meaning assigned to it in the definition of operating department.

ACTIVITY

Means the work, or one of several lines of work, carried on within any unit or organizational subdivision of the company.

COST

Means all expenditures incurred in terms of salaries, wages, and other expenses and includes taxes, licenses, and fees.

TIME RATIOS

Means the proportion of total clerical working time devoted to each subdivision of work in an organizational unit.

SALARY RATIOS

Means ratios obtained by weighting the time ratios of individual clerks by the amount of their salary.

SECTION C – INVESTMENT EXPENSE

Distribution of expenses to investment activities shall be made on the same principles as used for subdivision of insurance expense by major line of business. Investment expense (Exhibit 2, Column 5 and Exhibit 3, Column 4) shall include all amounts reported as Real Estate Expense (Exhibit 2, Line 9.1), Investment Expenses Not Included Elsewhere (Exhibit 2, Line 9.2), Real Estate Taxes (Exhibit 3, Line 1) and all other costs incurred in connection with the investing of funds, servicing of investments and the obtaining of investment income, or chargeable against investment income.

SECTION D – STANDARDS AND RULES FOR ALLOCATION OF RECEIPTS AND EXPENSES

1. General Instructions

It is the responsibility of each reporting entity to use only such methods that will produce a suitable and equitable distribution of receipts and expenses by lines of business. The methods of allocation and the application thereof shall be subject to review on examination.

Each reporting entity shall maintain records with sufficient detail to show fully:

- (1) The system used for allocation of receipts and expenses;
- (2) The actual bases of allocation;
- (3) The actual monetary distribution of the respective items of receipts, salaries, wages, expenses, and taxes to:
 - (a) Units of activity or functions, if any such distribution is made,
 - (b) Lines of business,
 - (c) Companies, and
 - (d) A recapitulation and reconciliation of items (a), (b) and (c) with the company's books of account and annual statement.

Such records shall be classified and indexed in such form as to permit ready identification between the item allocated and the basis upon which it was allocated, and shall be maintained in such a manner as to be readily accessible for examination. These records shall bear a date and shall identify the person responsible for the preparation thereof.

Bases of allocation shall be reviewed periodically to ascertain their suitability for continued use.

2. Premium Receipts

Premiums or considerations shall be allocated directly, either through the books of account or by memorandum records, to major lines. In the case of insurance on the debit basis, the total premiums may be distributed among the several lines of business on the basis of the relative proportions of premiums in force, properly weighted to reflect premium collection frequency.

Premiums on secondary lines of business which are not allocated directly to such lines of business may be distributed on the basis of: (1) the premiums in force, or (2) actual analyses of premium receipts covering test periods of sufficient length of time to assure the reliability of the sample. When the distribution is made on the basis of premiums in force:

- (1) The in force records shall segregate first-year, single, and renewal premiums,
- (2) The distribution shall be made separately for the first-year and renewal premiums, and
- (3) Adequate controls shall be maintained to assure the accuracy of the in force records.

3. Net Investment Income

The cost of granting and servicing premium notes and policy loans and liens shall be allocated to investment expense. The resulting net income on premium notes and policy loans and liens may be distributed to those lines of business that produced such income. In making such distribution, due consideration shall be given to the variation in the interest rate and incidence of expense on such notes, loans and liens.

Net investment income, after adjustment, if any, as permitted by the preceding paragraph shall be distributed to major lines and may be distributed to secondary lines of business in proportion to the mean contract reserves and liabilities or the mean funds of each line of business, after suitable adjustment, if any, on account of policy loans, except that any miscellaneous interest income arising from policy or annuity transactions may be allocated directly to the line of business producing such income.

In lieu of the methods referred to above, a reporting entity may distribute net investment income by an investment year method that recognizes periodic variations in the yield on new investments, and the varying contributions of the various lines to the funds invested. If a year of investment method is used to allocate net investment income by line of business, complete Note 7 of the Notes to Financial Statements.

4. Other Receipts

Reserves and reserve adjustments received from reinsurers shall be allocated directly to the appropriate line of business. All other sundry receipts and adjustments shall be allocated to the appropriate line of business consistent with the nature of the transaction.

5. Commissions

Commissions on premiums and considerations shall be allocated directly to major lines of business. In the case of debit business, the total commissions paid may be distributed among the several lines of business on the basis of the relative proportions of such premiums in force, properly weighted to reflect the commission rates payable.

To the extent practicable, commissions on secondary lines of business shall be allocated directly. Where not practicable, the distribution to such lines of business may be made separately for first-year and renewal commissions in proportion to the respective first-year and renewal premiums for each such line of business.

6. General Expenses, Taxes, Licenses and Fees

In distributing costs to lines of business, each company shall employ those principles and methods that will reasonably reflect the actual incidence of cost by line of business. The relative time spent, the extent of usage and the varying volume of work performed for each line of business shall be considered in distributing cost to major lines of business and, to the extent practicable, to secondary lines. The costs of any unit of activity in performing work for one line of business and only incidentally for other lines may be allocated entirely to the single line of business.

In the application of the principles stated herein, special consideration may be given to a new line of business with respect to the costs of service departments and of executive departments responsible for the general administration of the company to the extent that such costs have not been increased by the addition of such new line of business and to the extent justifiable; special treatment also may be given to combined operations in connection with group business. Operational costs incurred for entering a new line of business, such as calculation of premium rates, preparation and printing of policy forms and rate books, etc., should be allocated directly to the new line of business whether incurred before or after beginning the new line.

In the distribution of a specific category of cost to lines of business, an appropriate index of the activity or activities giving rise to such cost shall be used. Such index should fluctuate with the specific category of cost and be capable of measurement. For example, as illustrations of principles only and not of required procedures:

- (1) Clerical salaries of operating departments may be distributed to lines of business on the basis of time or salary ratios, the former used where approximately the same average rate of compensation is paid to clerks whose salaries are being distributed.
- (2) The cost of service departments may be distributed to other departments in proportion to the value of the services rendered each department, e.g., the cost of a personnel department may be distributed to other departments on some general basis such as number of clerks; a photostat section on a unit cost basis; or, in the case of a central tabulating unit, on an hourly rate reflecting the cost for each type of machine used.

- (3) Supervisory costs may be distributed to lines of business in the same proportions as the distribution of the salaries of the persons supervised.
- (4) The cost of executive departments responsible for general administration of the company, including the salaries of the executive officer or officers, may be distributed to lines of business in the same proportions as the salaries of all other officers and employees.
- (5) Social Security taxes may be distributed to lines of business in proportion to the corresponding distribution of taxable salaries.
- (6) Departmental rent charges may be made in proportion to the amount of floor space occupied and distributed to lines of business on some appropriate basis, such as salaries.
- (7) Costs, such as meals for employees, telephone, telegraph, postage, office forms, stationery and supplies may be distributed first to departments on the basis of usage or on an appropriate general basis, and then distributed to lines of business on some appropriate basis, such as salaries.
- (8) In using number of transactions as a basis for distributing cost to lines of business, each type of transaction within an organizational unit may be weighted to reflect its relative cost. The average clerical time or average clerical cost per transaction may be used as a weight or, in special situations such as the approval of death and disability claims, the relative weights may be determined by case studies.

Estimates of time spent on activities may be used in the distribution of costs to lines of business, only where such activities by their nature are not susceptible of objective measurement, or where the cost of making time studies is disproportionate to the expenses being distributed, or where estimates of time are otherwise clearly appropriate. Where such estimates are made, they shall be made by a person or persons familiar with the nature of the activity and shall be reviewed by an executive responsible for expense allocations. General indices such as premium volume, number of policies, and insurance in force shall not be used as bases for distributing costs among major lines of business, except where the incidence of cost is closely related to such general indices, or except where there is no more appropriate basis for measurement. Such general indices may not be used in distributing claim costs to secondary lines of business.

The ratio of investment income to total receipts, the ratio of direct investment expense to total expenses, and any similar formula shall not be used in distributing costs between insurance and investment expense, except where there is no more appropriate basis for distribution.
