

There are several additions expected for Mid/End-January addendum:

- We plan to assign NAIC Designations to certain CUSIPs of recently issued, CAS 2018-C06 in the January addendum upload.
- We are currently reviewing STACR HARP transactions for inclusion in January.
- Please note that we expect to provide NACI Price Grids for certain CUSIPs of STACR SPI transactions in January within [AVS+](#) (STS).

We'd also like to inform you that, this year-end, we do not expect to financially model the newest structures of GSE's CRT offerings introduced in 2018 as they require additional time for us to study and review.

P.S. we also maintain up to date notifications on our [Website](#) and will post on the Bulletin within [AVS+](#).
